SPRING

07

Welcome to PRISM's Spring Catalog, our second such effort. Your response to our Anniversary Invitational catalog last Fall was so overwhelmingly positive and supportive, here we are again – with a few changes.

First, this catalog is not limited to works from a particular exhibition, but is a select survey of our favorite artists... and a sneak peek at the future. While 11 of the 13 wonderful pieces we featured last time sold within weeks, we are continually building on our relationships with those artists to bring you fabulous works all year long.

Second, we have made special arrangements with a number of artists to present works exclusive to this catalog. While all works are available, these "Catalog Exclusives" will generally be shipped to you direct from the artist's studio. This minimizes handling, the possibility of damage, and to some extent, cost. But it's mostly because we're SO excited by a number of these artists that we just couldn't wait to share them with you.

We hope you enjoy our Spring Collection, and that you'll let us know your particular favorites. In addition, we welcome your feedback on the catalog design, as well as the content; it's our way of bringing the gallery to you.
